UNIT 1 TYPES OF HOTELS

Read the texts and translate them. While reading try and find answers to these questions:

1. Why were most downtown hotels constructed in waves?
2. Why do many airport hotels enjoy a high occupancy?
3. What helps to lower the rates in freeway hotels and motels?

TYPES OF HOTELS

City Center Hotels

City center hotels, due to their location, meet the needs of the public traveling for business or leisure reasons. These hotels could be luxury, midscale, business, suites, economy, or residential. They offer a range of accommodations and services. Luxury hotels might offer the ultimate in decor, butler service, concierge and special concierge floors, secretarial services, computers, fax machines, beauty salons, health spas, twenty-four-hour room service, swimming pools, tennis courts, valet service, ticket office, airline office, car rental, and doctor/nurse on duty or on call. Generally, they offer a signature restaurant, coffee shop, or an equivalent name restaurant; a lounge; a name bar; meeting and convention rooms; a ballroom; and possibly a fancy night spot.

City center hotels were constructed in waves; stimulated by government regulations, investors developed hotels when the climate was right. For example, tax incentives for urban renewal projects created favorable economic conditions in the 1960s. This led to the construction of new downtown hotels in many cities. Another boom time for hotel development was the 1980s. Together with convention centers and office buildings, hotels have been one of the catalysts in inner-city revitalization. The *Copley Center* in Boston and the *Peachtree Plaza* in Atlanta are good examples of this.

Airport Hotels

Many airport hotels enjoy a high occupancy because of the large number of travelers arriving and departing from major airports. The guest mix in airport hotels consists of business, group, and leisure travelers. Passengers with early or late flights may stay over at the airport hotel, while others rest while waiting for connecting flights.

Airport hotels are generally in the 200- to 600-room size and are full service. In order to care for the needs of guests who may still feel as if they are in different time zones, room service and restaurant hours may be extended, even offered twenty-four hours. More moderately-priced hotels have vending machines.

As competition at airport hotels intensified, some added meeting space to cater to business people who want to fly in, meet, and fly out. Here, the airport hotel has the advantage of saving the guests from having to go downtown.

Freeway Hotels and Motels

Freeway hotels and motels came into prominence in the 1950s and 1960s. As Americans took to the open road, they needed a convenient place to stay that was reasonably priced with few frills. Guests could simply drive up, park outside the office, register, rent a room, and park outside of the room. Over the years, more facilities were added: lounges, restaurants, pools, soft drink machines, game rooms, and satellite TV.

Motels are often clustered near freeway off-ramps on the outskirts of towns and cities. Today, some are made of modular construction and have as few as eleven employees per hundred rooms. These savings in land, construction, and operating costs are passed on to the guest in the form of lower rates.

Extended-Stay Hotels

These hotels cater to guests who stay for an extended period. They will, of course, take guests for a shorter time when space is available. However, the majority of guests are long-term. Guests take advantage of a reduction in the rates based on the length of their stay.

The mix of guests is mainly business and professional/technical, or relocating families. *Residence Inns* and *Homewood Suites* are market leaders in this segment of the lodging industry. These properties offer full kitchen facilities and shopping services or a convenience store on the premises. Complimentary continental breakfast and evening cocktails are served in the lobby. Some properties offer a business center and recreational facilities.

Read the supporting article and provide detailed answers to the case questions below.

When Nicholas Pritzker emigrated with his family from Ukraine to the United States, he began his career by opening a small law firm. His outstanding management skills led to the expansion of the law firm, turning it into a management company. The Pritzkers gained considerable financial support, which allowed them to pursue their goals of expansion and development. These dreams came into reality with the opening of the first Hyatt Hotel, inaugurated on September 27, 1957.

Today, *Hyatt Hotel Corporation* is a \$2.5 billion hotel management and development company; together with Hyatt International, they are among the leading chains in the hotel industry, with 8.5 percent of the market share. The company owns 173 hotels and resorts worldwide: 107 in North America, Canada, and the Caribbean, and 66 in international locations. Hyatt has earned

worldwide fame as the leader in providing luxury accommodations and high-quality service, targeting especially the business traveler, but strategically differentiating its properties and services to identify and market to a very diverse clientele. This differentiation has resulted in the establishment of four basic types of hotels:

1. *The Hyatt Regency Hotels* represent the company's core product. They are usually located in business city centers and regarded as five-star hotels.
2. *Hyatt Resorts* are vacation retreats. They are located in the world's most desirable leisure destinations, offering the "ultimate escape from everyday stresses".
3. *The Park Hyatt Hotels* are smaller, European-style, luxury hotels. They target the individual traveler who prefers the privacy, personalized service, and discreet elegance of a small European hotel.

The Grand Hyatt Hotels serve culturally rich destinations that attract leisure business as well as large-scale meetings and conventions. They reflect refinement and grandeur, and they feature state-of-the-art technology and banquet and conference facilities of world-class standard.

UNIT 2 ROLE OF THE HOTEL GENERAL MANAGER

Read the text and translate it. While reading try and find answers to these questions:

1. Whose responsibility is it to keep guests satisfied and returning?
2. What periods in large hotels are considered to be "peak times"?
3. What is Rick Segal's position in the famous *St. Regis Hotel*?

ROLE OF THE HOTEL GENERAL MANAGER

Hotel general managers have a lot of responsibilities. They must provide owners with a reasonable return on investment, keep guests satisfied and returning, and keep employees happy. This may seem easy, but because there are so many interpersonal transactions and because hotels are open every day, all day, the complexities of operating become challenges that the general manager must face and overcome.

Larger hotels can be more impersonal. Here, the general manager may only meet and greet a few VIPs. In the smaller property, it is easier – though no less important – for the GM to become acquainted with guests, to ensure their stay is memorable, and to secure their return. One way that experienced GMs can meet guests, even in large hotels, is to be visible in the lobby and food and beverage (*F & B*) outlets at peak times (check-out, lunch, check-in, and dinner time).

Guests like to feel that the GM takes a personal interest in their well-being. Max Brown, who was general manager of the famous *George V Hotel* in Paris for more than thirty years, was a master of this art. He was always present at the right moment to meet and greet guests. In fact, he often made such a spectacle that other guests would inquire who he was and then would want to meet him. Hoteliers always remember they are hosts.

Rick Segal, vice president of *Sheraton's* luxury hotel division, credits his success to several things, but the quality he mentions first is paying attention to detail. As general manager of the famous *St. Regis Hotel* in New York City, he has plenty of opportunities to do just that.

The GM is ultimately responsible for the performance of the hotel and the employees. The GM is the leader of the hotel. As such, she or he is held accountable for the hotel's level of profitability by the corporation or owners.

General managers with a democratic, situational, and participating leadership style are more likely to be successful. There are, however, times when it is necessary to be somewhat autocratic – when crisis situations arise.

CASE STUDY

CHEQUING IN

(Why are Britain's hotels so expensive?)

Background:

Shortage of hotel rooms in London, coupled with strong demand, keeps prices sky-high. Besides being the most expensive in Europe, British hotels' personnel demonstrate incompetence on every level to say nothing of grubby crockery and dysfunctional plumbing.

Read the supporting article and provide detailed answers to the case questions.

In the aftermath of the foot-and-mouth crisis, Kim Howells quipped that a lot of British hotels "make 'Fawlty Towers' look like a documentary". Not the sort of thing you'd expect to hear from the tourism minister. But he's got a point. Your recently married correspondent, for one, is still reeling from a hotel honeymoon of unforgettable, unutterable awfulness – a stunning exhibition of incompetence on every level, from grubby crockery and dysfunctional plumbing to a service ethos that would have made Basil himself cock an admiring eyebrow.

Such experiences don't come cheap. According to the "Which? Hotel Guide 2015", British hotels are the most expensive in Europe, from the lowliest dosshouse up. The situation is especially bad in London, where a shortage of hotel rooms, coupled with strong demand, keeps prices sky-high. "You can find a good, individual hotel in the middle of Paris for €60 a night", says Patricia Yates, co-editor of the "Which? Hotel Guide", "but I wouldn't like to try to find one at that price in London – or to have to stay there".

The strength of the pound is often blamed, VAT is certainly a factor: at 17.5% it is the second highest in Europe, after Denmark. Elsewhere it hovers between 3% and 10%. But any independent hotelier will tell you that it is above all the cost of property that accounts for the scarcity of well-designed, moderately priced, owner-run hotels in central London.

HOTEL RESTAURANTS

A hotel may have several restaurants or no restaurant at all; the number and type of restaurants varies as well. A major chain hotel generally has two restaurants: a signature or upscale formal restaurant and a casual coffee-shop type of restaurant. These restaurants cater to both hotel guests and to the general public. In recent years, because of increased guest expectations, hotels have placed greater emphasis on food and beverage preparation and service. As a result, there is an increasing need for professionalism on the part of the hotels' personnel.

Hotel restaurants are run by restaurant managers in much the same way as other restaurants. Restaurant managers are generally responsible for the following:

- exceeding guest service expectations;
- hiring, training, and developing employees;
- setting and maintaining quality standards;
- marketing;
- room service, mini-bars, or the cocktail lounge;
- presenting annual, monthly, and weekly forecasts and budgets to the food and beverage director.

Some restaurant managers work on an incentive plan with quarterly performance bonuses. Hotel restaurants present the manager with some interesting challenges because hotel guests are not always predictable. Sometimes they will use the hotel restaurants, and other times they will dine out. If they dine in or out to an extent beyond the forecasted number of guests, problems can arise. Too many guests

for the restaurants results in delays and poor service. Too few guests means that employees are underutilized, which can increase labor costs unless employees are sent home early. Fortunately, over time, a restaurant manager keeps a diary of the number of guests served by the restaurant on the same night the previous week, month, and year. The number and type of hotel guests (e.g., the number of conference attendees who may have separate dining arrangements) should also be considered in estimating the number of expected restaurant guests for any meal. This figure is known as the *capture rate*, which, when coupled with historic and banquet activity and hotel occupancy, will be the restaurant's basis for forecasting the number of expected guests.

Most hotels find it difficult to coax hotel guests into the restaurants. However, many continuously try to convert food service from a necessary amenity to a profit center. The *Royal Sonesta* in New Orleans offers restaurant coupons worth \$5 to its guests and guests of nearby hotels. Another successful strategy, adopted by the *Plaza Athenee* in New York, is to show guests the restaurants and explain the cuisine before they go to their rooms. This has prompted most guests to dine in the restaurant during their stay. At the *Sheraton Boston Hotel and Towers*, the restaurants self-promote by having cooking demonstrations in the lobby: The "onsite" chefs offer free samples to hotel guests.

Progressive hotels, such as the *Kimco Hotel*, in San Francisco, ensure that the hotel restaurants look like free-standing restaurants with separate entrances. They also charge the restaurants rent and make them responsible for their own profit and loss statements.

Compared with other restaurants, some hotel restaurants offer greater degrees of service sophistication. This necessitates additional food preparation and service skills and training. Compared to free-standing/independent restaurants, it is more difficult for hotel restaurants to operate at a profit. They usually are open from early morning until late at night and are frequently underpatronized by hotel guests who tend to prefer to eat outside of the hotel at independent restaurants.

CASE STUDY

CANADIAN PACIFIC HOTELS

Background:

Being involved in many programs, the Canadian Pacific Hotel company has done a lot to benefit the population of Canada.

Read the supporting article and provide detailed answers to the case questions.

Canadian Pacific Hotels are involved in many programs to benefit the residents of Canada. An environmental program that started in 2010, which all hotels in the chain are involved in, is doing great. Canadian Pacific Hotels have set goals for themselves, such as reducing waste and collecting recyclables from the guest rooms. The hotels have reached their goal of being nature-friendly with the help of an environmental consultant. The corporation received the "Green Hotelier of the Year" award in 2016 for outstanding efforts to improve environmental performance.

Another program that Canadian Pacific is currently involved in is the Adopt-A-Shelter program. Each hotel in the chain adopts a local women's shelter and donates goods, services, and financial support, mainly used furniture and household items. The relationship between the hotel and the shelter is a continuing one.

The Canadian Pacific Charitable Foundation will also donate \$150,000 to the Canadian Women's Foundation during the next three years. This money will help the Women's Foundation set up "Canadian Pacific Violence Prevention Fund", which will help support many violence prevention programs across Canada.
